PROFESSIONAL SUMMARY

Cloud & DevSecOps enthusiast with hands-on experience in AWS infrastructure automation, CI/CD pipeline concepts, and cloud security best practices. Built real-world solutions using EC2, S3, IAM, VPC, CloudWatch, and Rekognition with Python (Boto3). Experienced with Docker, Jenkins, Ansible, Kubernetes, and Terraform through internships. Passionate about automation, secure coding, and scalable cloud systems. AWS Developer Associate certified.

TECHNICAL SKILLS

Cloud & AWS	EC2, S3, IAM, VPC, CloudWatch, Lambda, Rekognition, RDS, Bedrock, SNS, Route53, Cognito
CI/CD & DevOps Tools	Jenkins, GitHub Actions, Git & GitHub, Docker, Ansible, Kubernetes, Terraform
Scripting	Python (Boto3 Automation), Shell Scripting
Operating Systems	Linux (Ubuntu), Windows
Web Development	HTML, CSS, JavaScript
Programming (problem-solving)	Python, C++, Java
DataBase	DynamoDB, MySQL, MongoDB

PROFESSIONAL EXPERIENCE

AWS DevOps Intern | Technical Hub — **May 2025 – Jul 2025 | Surampalem, AP**

- Assisted in building and maintaining CI/CD pipelines using Jenkins and GitHub Actions for automated deployment workflows.
- Worked with Docker for containerization and Kubernetes for orchestration of cloud-based applications.
- Used Ansible for configuration management and Terraform for infrastructure provisioning on AWS.
- Monitored applications and infrastructure using AWS CloudWatch; documented pipelines and deployment procedures.

AWS Developer Intern | Technical Hub — **May 2024 – Jul 2024 | Surampalem, AP**

- Automated and managed AWS EC2, S3, and RDS services using Python Boto3 SDK, reducing manual cloud operations.
- Configured IAM roles and policies following least-privilege security best practices for secure cloud access.
- Wrote Shell scripts to automate routine cloud tasks; used Git/GitHub for version control and team collaboration.

PROJECTS

Traffic Violation Detection using AWS — ***Python, DynamoDB, Rekognition, Bedrock, Streamlit, S3, IAM, Cognito, SMTP***

Git Repo [github.com/22MH1A42G1/traffic-violation-reporter-with-vehicle-number-detection]

- Developed an AI-powered web app using AWS Rekognition and Bedrock to detect traffic violations with 95% accuracy.
- Integrated automated email notifications for real-time alerting; secured S3 storage with IAM-controlled access for violation records.

Face Recognition Attendance System using AWS — ***Python, Rekognition, S3, Streamlit, Boto3, IAM***

Git Repo [github.com/22MH1A42G1/Face-Recognition-Attendance-System-repository-iship]

- Built a secure automated attendance system using AWS Rekognition; facial data stored in S3 with IAM least-privilege access policies.
- Integrated DynamoDB as the backend store for attendance records, enabling automated logging and retrieval of recognition results.

AWS Automation with Boto3 SDK — ***Python, IAM, RDS, S3, EC2, Streamlit, Boto3***

Git Repo [github.com/22MH1A42G1/Aws-Automation-With-Boto3]

- Automated EC2 provisioning, RDS management and S3 operations using Boto3, Implemented IAM role-based access for secure automation.
- Built scripts to streamline AWS resource management.Reduced manual deployment time by 60%.

EDUCATION

B.Tech. in CSE (AI & ML) | Aditya College of Engineering & Technology (JNTUK) — **Sep 2022 – Apr 2026 | Surampalem, AP**

CGPA: 7.48 / 10 (67.30%)

- Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Database Management Systems

CERTIFICATIONS

- **AWS Developer Associate** – Amazon Web Services
- **IT Specialist – Python** – Certiport
- **Docker Essentials** – Cognitive Class
- **AWS Academy Graduate** -- AWS Academy Cloud Foundations
